

0.01 HZ TO 5 MHZ FUNCTION GENERATOR, FREQUENCY METER - 15 W AMPLIFIER

References : GF467F, GF467AF

Version with amplifier
Complete:

- 50 MHz reciprocal frequency meter
- Linear or logarithmic internal sweep and VCF or FM external sweep. AM modulation
- CMOS function
- Offset independent of the attenuator.

Precise:

- High quality signals
- Cyclic ratio continuously variable across all ranges

Protected:

All inputs and outputs are protected against voltage feedbacks up to $\pm 60V$
Easy: Displays all parameters

Technical characteristics:

- Signal shape: sine, triangle, square, ramp

- Frequency range: 0.01 Hz to 5 MHz in 8 ranges
- Precision
