

0-24 V AC / DC STABILISED POWER SUPPLY

Reference : AL24VACDC

Versatile power supply for all low voltage experiments that can be used as a power generator. Four displays indicate current and voltage for each output (AC and DC). Continuously adjustable current limiter for DC. Electronic current limiter for AC.

Technical characteristics:

- DC output:
Voltage: continuously adjustable: 0 - 24 V
Intensity (0-12 volts): 0 - 10 A (for 0-12 V) and falling linearly 0 - 10/6 A (for 12-24 V)
Protection: electronic
Wave and noise:
