

3 IN 1 VACUUM ACCESSORY

Reference : VID3EN1

Original model for the study of vacuum - 3 different ways of revealing vacuum

This original model allows you to reveal the vacuum inside a vacuum bell in 3 different ways: sound, air movement, pressure difference.

consists of a plexiglass stand on which 3 devices are arranged to reveal the vacuum:

- 1 buzzer for revealing vacuum by sound;
- 1 motor with propeller placed in front of a mast on which are hung light strips agitating when there is air displacement.
- 1 cylinder allowing you to perform the bladder bursting experiment for example.

Dimensions: 100 x 100 x 108 mm

Power supply: battery (not included)

On /off switch
