

# 3V MANUAL ELECTRIC GENERATOR

Reference : GEM3V

**Safe! Ideal for the basics of electricity in school!**

**Works without any power**

**Transparent frame to visualise the mechanism**

**Polarity defined by the direction of rotation of the crank**

Ideal for studying electricity basics in school without using a battery or AC power!

By simply turning the crank by hand, this mini portable generator can safely generate up to 3V and serve as a power supply for many basic electrical experiments.

Complementary modules with E10 lamp, LED or capacitor (optional) simply plug in with a small coding pin with a plug.

Composition:

- 1 manual electric generator
- 1 x 1 m cord with alligator clips
