

5400 RPM CENTRIFUGE FOR MICRO-TUBES

Reference : CENTRIF

Mini juicer

Fixed speed: 5,400 rpm (2,000 g)

Quiet model (50dB) and very stable with its weight of 1,85 kg, even in case of bad balance.

The rotors can be changed extremely easily with a very well designed clip-on system.

Secure opening by push button.

Dimensions (W x D): 175 x 140 mm

This is a very simple, space-saving and very robust model.

Capacity:

- 6 tubes of 1.5 or 2 ml
- 16 x 0.2 ml PCR microtubes in strips or 12 individual PCR microtubes
 - Preferably use PCR microtube strips
 - When using individual PCR tubes, capacity reduced to 12 microtubes (do not use the 4 places at the ends of the rotors for PCR tubes).

Supplied with two rotors (for PCR microtube strips and for 1.5mL tubes).

Reference	CENTRIF
Adjustable speed	No

Max speed rpm	5400
Acceleration	2000 g
Timer	No
Capacity	8 eppendorf tubes (0,2 to 2 mL) 16 tubes of 0,2 ml
Nb of rotors included	2
Dimensions	175 x 140 mm (L x P)
Mass	1.85 kg
