

ABBE REFRACTOMETER

Reference : ABBE

This apparatus makes it possible to determine, on two scales, the refractive index and the BRIX degree, as well as the dispersion. It is used to perform quantitative analyses of binary mixtures, concentrations of sugars, fats, etc. For liquids and solids of the type glass, plastic, etc.

Refractive index: 1,3000 to 1,7000

- Precision: 0.0003
Sugar (BRIX): 0 to 95%
- Precision: 0.2% from 0 to 50%; 0.1% from 50 to 95%
- Dimensions: 15 x 10 x 24cm
- Weight: 4.5kg
Supplied with: 1 thermometer, 1 gauge block, 1 bottle of contact liquid, 1 screwdriver, 1 carrying case and instructions.
