

References : CAISVENT2, CAISVENT1

Extraction units, easy and convenient installation.
Safe absorption of vapours and gases escaping from their point of release or production.
Silent operation

Delivered ready to use with connection and power cables.
To connect these units on Asecos cabinets, no accessories are required: they are fitted directly above the cabinets. Just provide a flexible hose (Ø 75 mm) to make the connection between the unit and the external discharge point.
Two models are offered:

- Standard model: the green LED goes off in case of power failure
 - Model with airflow control: integrated pressure leak detection tool; in case of failure, the green LED goes out while the red light goes on
- Technical characteristics:

- Power: 35 W
- Power supply: 230 V - 50 Hz
- Noise level
