

AUTOMATIC PIPETTE WASHER

References : BTLP218, BTLP219, LP215, LP217

This automatic system for washing pipettes and burettes allows for quick and efficient washing. The dimensions of this device make it possible to accommodate any size of pipettes and burettes. The elastic polyethylene bottom protects your glassware from breakage.

The washing is carried out automatically by successive filling and emptying cycles. The operation of the pipette washer is guaranteed even with a reduced flow (hose not supplied).

Pipette washer available in two sizes. To be completed with a soaking tank and a pipette holder basket.

Materials: Polypropylene and polyethylene

Pipette holder basket
