

# BOX OF 43 ATOMS

Reference : COF43AT

**43 atoms**

**43 atoms**

**Case with transparent hood**

**Large atoms**

**Scales and orientations of the links respected: 1.5 cm / Å in compact representation**

**No removable links!**

Set consisting of 43 compact large molecular models to illustrate different combustions:

- Complete carbon combustion
- Incomplete carbon combustion
- Methane combustion
- Butane combustion  
Composition:
- 16 hydrogen atoms (30 mm)
- 16 oxygen atoms (40 mm)
- 11 carbon atoms (40 mm)
