

CAPTAIR 832 MIDCAP CABINET

References : CAPTAIR832AS, CAPTAIR832BE

Ventilated filtration cabinet for storage of many reagents present in the laboratory.
No external connection.

Principle of filtered air recirculation

Technical characteristics:

- Dimensions: 900 x 500 x 2050 mm
- Storage volume: 120 bottles of 1 litre
- Filtration technology tested according to standard NFX 15-211
- Number of fans: 1
- Air flow: 70 m³ / h
- Renewal of air with door closed: 115 times / hour
- Electric power: 35 W
- Coating: anti-corrosion steel coated with 100% polyester
- Door: 6 mm synthetic glass
- Double compartment for storage of compatible and / or incompatible products
