

CARTS ON AIR CUSHION BENCH

References : MOBCOUS1, MOBCOUS2

These carts introduce students to the study of movements. A motor with a propeller located inside the cart generates an air cushion under their surface, considerably reducing the friction and thus allowing qualitative studies. A protective foam all around the cart helps cushion it from impacts.

A switch located under the cart next to the battery compartment door (screw closure) makes it possible to activate or deactivate the blower. Carts come in 2 sizes. The large cart is suitable for use on the ground, the small size being perfect for use on the table.

Big model

Réf : MOBCOUS2

Small model

Réf : MOBCOUS1

Reference	Diameter	Power supply
MOBCOUS1	90 mm	2 piles AAA/LR06 (non fournies)
MOBCOUS2	180 mm	4 piles AA/LR03 (non fournies)
