

# CCD CALIENS CAMERA

Reference : CAMCCD

The CALIENS camera allows the sampling and the exploitation of luminous figures thanks to a user friendly piece of software. Diffraction and interference measurements become simple, precise and intuitive thanks to a series of cursors and quick visualisation. Adjustable integration time for more precision and comfort.

## Composition:

- CCD camera
- Complete software for download
- USB cable

- Stainless steel rod  $\varnothing$  10 mm
- Technical characteristics:

- 2,048 pixel CCD sensor 14  $\mu$ m wide (sensitive area of about 30 mm).
- Adjustable integration time
