

COMPACT 4-COLOUR LED LIGHTING SYSTEM

Reference : METALIGHT2

Compatible with other brands of tanks (contact us)

This ingenious 4-colour LED lighting system effectively illuminates chlorophyll organisms inserted in the metabolism tank without heating.

This compact system (50 x 50mm) can be easily installed by sliding in place the shutter of the cellular enclosure, or attaching it to a camera tripod (influence of photosynthetic intensity depending on the distance).

Power supply: 12V AC adapter

Lights: Red, green, blue and white
