

References : CROCOND2, CROCOND3

These components are mounted directly on 2 red and black cords with crocodile clips to connect very easily to a circuit, or directly to a battery, a resistance wire, etc.  
The 2 wires are of different lengths, thus avoiding an involuntary discharge by contact of the 2 crocodile clips.

Capacitor 2.3V / 10 F  
**Réf : CROCOND3**

Capacitor 2.3V / 4.7 F  
**Réf : CROCOND2**
