

DANIELL BATTERY

Reference : 40061

This battery has long served as benchmark standard, given its constancy and its electromotive force close to 1.10 V.

Composition:

- 1 glass beaker - 600 mL
- 1 cylindrical zinc electrode
- 1 cylindrical copper electrode
- 1 porous pot
To be completed with solutions of copper sulphate II and zinc sulphate (dissolving powders or solutions available in the catalogue)
