

# DC MOTOR / GENERATOR

Reference : MOTGENCC

Sturdy and reliable DC motor that can also be used as a generator.  
It is equipped with a double pulley with cylindrical winding shaft with a choice of diameter: Ø 8 or Ø 12 x 12 mm. The stand is mounted on a stainless steel rod Ø 10 x 35 mm and can therefore be easily mounted on laboratory brackets.

Operating voltage: 0-12 V DC.

Power supply by Ø 4 mm banana safety sockets.

Dimensions: 225 x 40 x 40 mm.
