

DIDACTIC ELECTRIC METER

Reference : COMPTDIDAC

Apparatus comparable to a domestic electric meter, adapted to operate in single phase on a voltage of 220 V - 50 Hz.

Just connect a device (2P + T socket) to find out the consumption.

The disk indicates the power consumption in kWh.

The set is mounted in a plastic case with transparent cover.

Ø 4 mm safety banana sockets are used to connect a voltmeter and an ammeter and check the information given by the device.

Technical characteristics:

- Voltage: 220 V
- Frequency 50 Hz
- Max intensity: 20 A
- Protection: 20 A fuse
- Dimensions: 160 x 160 x 130 mm
- Mass: 0.5 kg
