

DIGITAL ADAPTER

Reference : PS-2159

This adapter is essential to operate some devices (such as the free fall adapter ref. ME-9207B) with the different interfaces of the 850 or the 550.

Two ports are included on the digital adapter, allowing you to connect 2 sensors simultaneously.

It is possible to use several adapters simultaneously by connecting them, for example, to a Sparklink (ref. P / PS-2009) or a GLX interface (Ref. P/PS-2002).

Common applications:

Passage sensors

Free fall system

Period of a pendulum
