

Reference : NRJRENOUV

This Discovery Kit is a modular package designed to illustrate the operation of a complete clean energy technology system on a miniature scale. The elements can be used together, or separately. This perfectly illustrates the use and storage of renewable energy.

Composition of the kit:

- Fuel cell
- Electrolyser
- Wind turbine
- Propeller engine
- Tanks for hydrogen and oxygen
- Photovoltaic cell
- 2 LEDs on stand
- Variable resistance 100  $\Omega$
- Assembly circuit

- Connection cords and mounting accessories (silicone tube, syringe, ...)
- Complete instructions for assembly and use
