

Reference : ADN0079

Flexible molecular DNA model on stand. Represents double helix and replication.  
Height: 50 cm

Composition :

- 28 nitrogen bases of 4 different colours
- 12 cores with two bars representing the hydrogen bonds between two bases (white)
- 28 sugars (black)
- 25 phosphates (red)
- 50 sugar-phosphate bonds (yellow)
- Wooden stand and base
