

DNA ELECTROPHORESIS TANK - 2 GELS

Reference : CUV2G

DNA and protein Electrophoresis tank

The EDVOTEK electrophoresis tanks are completely safe thanks to their lids incorporating the wiring, which ensures total safety since the connection is only made when the tank is hermetically closed.

The design of the gel moulds is very clever and allows a very easy preparation of the gels: they come with rubber stoppers and incorporate notches to position the combs.

All plastic parts are UV permeable, the electrodes are platinum and corrosion resistant.

|----------------------------------|-----------------------|
| Reference | CUV2G |
| Purpose | DNA + Proteins |
| Molds | 2 molds 70 x 70 mm |
| Nb combs | 4 |
| Nb wells | 6, 8 or 10 |
| Dimensions (Wx D x H) | 26.7 x 11.5 x 11.5 cm |
| Power supply included | No |
| Transilluminator included | No |
| Warranty | Lifetime |
