## For the whole class

This simple model consisting of more than 2,000 elements allows the study of DNA composition, RNA replication and transcription.

The flexibility of the links makes it easy to form it into a spiral or flat.

Composition :

- 570 white balls
- 570 red balls
- 140 orange balls
- 140 green balls  
140 blue balls
- 140 yellow balls  
140 purple balls
- 140 pink balls
- 300 bonds (between nucleotides)
