

ELECTROLYSER WITH REMOVABLE ELECTRODES

Reference : 40630

- Stable and chemical resistant tank
- Connection by banana safety sockets \varnothing 4 mm
Device with interchangeable electrodes for performing all kinds of electrolysis. The large and stable base is equipped with 2 banana safety sockets. The connection of the sockets to the electrodes is simply done via a system with crocodile clips.

Composition:

- 1 plastic tank \varnothing 100 x height 80 mm
- 4 pairs of electrodes (graphite, copper, iron, nickel) mounted on 2-hole stoppers
