

ELECTROMAGNETIC FREDERIKSEN STRING VIBRATOR

Reference : VIBELECTRO

This electromagnetic string vibrator generates powerful mechanical vibrations when used with an amplified signal generator. The connections are made on secure $\varnothing 4$ mm banana sockets. Very robust, it is provided with a fuse and comes with a cord stand. Many accessories are available to perform multiple experiments.

Technical characteristics:

- Input: 6 V / 1 A max
- Dimensions: 120 mm x \varnothing 100 mm
- Mass: 1.26 kg
