

# ELECTROMAGNETIC STRING VIBRATOR

Reference : WA-9857

## Essential in Terminal S!

Excellent device allowing students to study the technical characteristics of mechanical waves: speed, frequency, wavelength, amplitude, resonance.

The buzzer is equipped with two safety banana sockets to connect a GBF, an acquisition interface (850 or 550) or the WA-9867 signal generator to vary the excitation frequency.

Comes with a 3 meter cord.

Several holes placed on the buzzer allow it to be fixed vertically or horizontally, on a table or on a rod.
