

# ELECTRON TUBE SET

PRODUCT SHEET

References : U19155, U19100, TUBELEC, U19105

This set allows the study of electronic trajectories and their deviation in electrostatic fields created by a condenser and / or magnetic fields created by Helmholtz coils.

**Réf : TUBELEC**

Electron beam deflection tube

This tube reveals the influence of magnetic (created by Helmholtz coils) or electrostatic (created by an integrated blade capacitor) fields on an electron beam.

Heating:
