

ELECTROPHORESIS TANK - 6 GELS

Reference : CUV6G

DNA and protein Electrophoresis tank

Ideal for the whole class!

The EDVOTEK electrophoresis tanks are completely safe thanks to their lids incorporating the wiring, which ensures total safety since the connection is only made when the tank is hermetically closed.

The design of the gel moulds is very clever and allows a very easy preparation of the gels: they come with rubber stoppers and incorporate notches to position the combs.

All plastic parts are UV permeable, the electrodes are platinum and corrosion resistant.

Reference	CUV6G
Purpose	DNA
Molds	6 molds 70 x 70 mm
Nb combs	6
Nb wells	6
Dimensions (Wx D x H)	26.7 x 31.75 x 11.5 cm
Power supply included	No
Transilluminator included	No
Warranty	Lifetime
