

# FREDERIKSEN AIR TRACK

Reference : AIRTRACK

System allowing the study of Newton's laws, uniformly accelerated movements, elastic or inelastic laws. The blower system (not included) allows movement of the mobile without any friction.

The aluminium bench graduated to the mm (graduation on each side of the bench) rests on 3 adjustable rubber feet. The total length of 2 meters offers a useful length of 1.90 meters, with perfect linearity.

The bench is delivered with 2 aluminium 170 g mobiles and a complete set of accessories stored in a plastic box: masses, pulley, buffer, stand, launcher, ...

Equipment to be completed with a blower (ref P / SOUFFLE), photogates with screen (ref P / SPEEDGATE) and gate stands (ref P / SUPFOUR)
