

GEIGER COUNTER - DOSIMETER

Reference : GEIGER2

With this Geiger radioactivity detector, detect X-rays and GAMMA or BETA particles in your current environment.

At each detection of radioactivity, a sound is emitted. An acceleration of the beeps indicates the proximity of a radioactive source.

Technical characteristics:

- Detector: Geiger-Mueller tube-counter
- Dose rate / local equivalent dose rate: 0.1 to 9.999Sv / h
- Effective dose rate: 0.001 to 9.999 mSv
- Energy range (gamma radiation): 0.05 to 3.0 MeV
- Energy range (beta radiation): 0.5 to 3.0 MeV
- Response time
