

HAND REFRACTOMETER

Reference : REFRACTO

Ideal for determining the concentration of sugars in liquid medium.
It tracks the consumption of glucose in a culture.
This portable refractometer is a precision optical instrument
With its low volume and light weight, it can be used everywhere!
Model with automatic temperature compensator

Measurement range: 0

- 32%. Precision: 0.2 %
Length: 160 mm; Diameter: 30 mm, Weight: 215g
Material: Aluminium
