

HANNA CONDUCTIVITY TESTER

Reference : CONDUCTEST

This tester is equipped with a resistant graphite probe offering good accuracy, requiring very little maintenance.

The built-in temperature sensor allows automatic correction of temperature measurements.

Light and compact, it is ideal for occasional measurements.

Range: 0.00 to 19.99 mS / cm

Resolution: 0.01 mS / cm

Precision: $\pm 2\%$ full scale

Calibration: Manual in 1 point by potentiometer

T ° correction: Automatic from 0 ° C to 50 ° C

Power supply: 4 x 1.5 V (batteries included)

Dimensions / Weight: 175 x 41 x 23 mm / 95 g
