

IMPELLER

Reference : ROUAUBE

Impeller, to illustrate the conversion of mechanical energy into electrical energy. A water jet on a large propeller will drive a DC motor (which behaves like a generator). A plastic divider isolates the electrical part of the water, preventing engine damage.

Dimensions (HxWxD): 15 x 11.5 x 14.5 cm

Outputs on 2 Ø 4 mm safety banana sockets CC 5,5V / 100 mA axis Ø 2 x 12 mm

Propeller: Ø 10 x 6 cm
