

INSECT SUCTION DEVICE

PRODUCT SHEET

Reference : ASPI2

Our insect vacuum cleaner is a simple and effective solution for the capture of insects that you wish to observe. It allows to keep the integrity of the insects for more relevant observations.

The tube used for the buccal aspiration is equipped with a 180 μm sieve to prevent the smallest insects from coming back up, and with a colored indicator for easy identification (mouth side).

Collector volume: 40 ml.
Food grade PVC tubing.
