

KIT D'ÉLEVAGE DES ARTÉMIAS

Reference : ARTEKIT

Artemia breeding kit

Feed your fish with living beings

Structure and functioning of agro-systems

Ecosystems: dynamic interactions between living things and between them and their environment

Incubator with base and air pump to breed Artemia nauplii in 24 to 48 hours

Assemble the incubator, connect the air pump, add water, salt and brine. After 24-48 hours, drain the water and collect the small brine shrimps in the sieve. Then just give them to the fish.

Composition: 1 ArtemioSet live feeding kit for breeding, with incubator cone with hemispherical lid, 1 base with screws, 1 air pump, 1 harvesting container, 1 Artemia sieve, 1.8 m air hose, 1 valve valve.

Ideal for working on ecosystems and especially in the framework of aquaponics.
