

MANUAL VACUUM PUMP

Reference : POMPV

Porcelain plate

Waterproof and self-lubricating manual vacuum pump.

By simple successive pressure on the handle, one can create a vacuum in a small enclosure or a desiccator.

A pressure gauge indicates the vacuum produced.

A capacity of 1 litre is depressurised in 30 seconds to 40cm of mercury.

A valve makes it possible to break the vacuum.

Inside diameter of fitting: 7mm.

Maximum vacuum: 815 mbar. Maximum pressure: 0.5 bar.
