

References : SUP200, SUP100

This very original product is a cord and probe holder that can be handled in any direction because it is equipped with a device with captive and multidirectional wheels. The very robust set is ideal for equipping laboratories and physical measurement rooms.

It comes in 2 models:

- 2 rails 260 mm long (at least 100 cords)
 - 4 rails 260 mm long (at least 200 cords)
- The rails are fixed on either side of a plastic tray that can be used to store test accessories or measuring devices. This tray is adjustable in height from 1 m to 1.80 m.
