

MOTORISED ROTARY EVAPORATOR WITH INTEGRATED WATER BATH

Reference : EVAPBM

This rotary evaporator model incorporates a detachable control panel that becomes the remote control of the equipment. A large LCD screen can control many parameters such as speed, temperature and operating time.

Technical characteristics:

- Large LCD display providing simultaneous information on speed, temperature and operating time
- Speed: from 20 to 280 rpm.
- Large 5 litre hot water / oil bath, up to 180 ° C
- Digital and precise temperature control with adjustable safety circuit Accuracy ± 1 ° C
- Detachable control panel that is used as a remote control of the equipment
- Patented refrigerant (1500 cm² cooling surface) with excellent cooling effect
- Motorised lift with quick-action, and automatic recovery of the evaporation flask in case of power failure
- Evaporative flask with ejector, easy to remove
- PC controllable equipment via USB connection

- Power: 1400 Watts
- Dimensions: 465 x 457 x 583 mm
- Mass: 15 kg
