

# MULTI-RISK CABINETS

References : CSM-54-1, CSM-105-2, CSM-105-1, CSM-54-2

Safe, approved and separate storage of different hazardous products in a single cabinet.

## Construction

- Strong and durable construction. Fully welded construction, suitable for demanding industrial applications
  - High quality scratch resistant structured painted surface, double wall door construction.
  - Doors equipped with a lock (integrated in the rotary handle)
  - Each compartment opens and closes separately.
  - Cabinet body in anthracite grey (and white swing doors (RAL9010))
  - Easy adjustment, adjusting device to compensate for uneven floor
- Ventilation  
Reduction of odours in the cabinet - integrated ventilation system for each compartment / storage level, natural ventilation in the lower part.

## Standard interior equipment

Each compartment is equipped with a shelf with retention tray and grating, or two sliding shelves with retention tray, depending on the chosen model

Reference	Compartments	Equipment	Ext. dimensions L	Mass - structure
-----------	--------------	-----------	-------------------	------------------

			<b>x W x H:</b>	
CSM-105-1	4	1 étagère avec bac de rétention et caillebotis par compartiment	1055 x 520 x 1950 mm	75 kg
CSM-105-2	4	2 étagères coulissantes avec bac de rétention en PE par compartiment	1055 x 520 x 1950 mm	75 kg
CSM-54-1	3	1 étagère avec bac de rétention et caillebotis par compartiment	545 x 520 x 1950 mm	51 kg
CSM-54-2	3	2 étagères coulissantes avec bac de rétention en PE par compartiment	545 x 520 x 1950 mm	51 kg
