

# MULTI-VOLTAGE POWER SUPPLY AC / DC 3 A

Reference : AL12VACDC

This power supply can deliver a stabilised DC voltage, continuously adjustable from 0 to 12 V. In addition, it provides an alternating voltage (unstabilised) selectable between 2, 4, 6 and 12 V. Technical characteristics:

- Continuous output:  
Output voltage: 0 - 12 V stabilised, continuous adjustment  
Output current (max.): 3 A  
Wave and noise (max.): 100 mV  
Electronic overload protection
- Alternative output:  
Output voltage: 2 - 4 - 6 - 12 V, selectable, unstabilised  
Output current (max.): 3 A  
Circuit breaker protection against overloads.
- Main voltage: 230 V / 50 Hz
- Dimensions: 203x225x117mm
- Weight: 3 kg

Reference	AL12VACDC
-----------	-----------

<b>Number of outputs</b>	2
<b>DC voltage</b>	0 to 12 V
<b>AC voltage</b>	2, 4, 6 or 12 V
<b>Max intensity</b>	3.0 A
<b>Precision</b>	-
<b>Ondulation</b>	100 mV
<b>Display</b>	No
<b>Protection</b>	Electronic overload protection or circuit breaker protection against overloads
<b>Dimensions</b>	203 x 225 x 117 mm
<b>Mass</b>	3 kg
<b>Warranty</b>	1 year
