

# OPERATIONAL AMPLIFIER ON STAND

Reference : SUPAOP

This stand for an operational amplifier consists of an insulating housing on which is fixed an 8-pin integrated circuit support.

Each pin is connected to a safety banana socket  $\varnothing$  4mm and a didactic screen print makes it possible to identify each of the contacts of any operational amplifier of the  $\mu$ A741, TL071 or TL081 type: inputs E + and E-, output, bias voltage of the PDO ( $\pm$  Vsat), ground, offsets.

The stand comes with an operational TL081 amplifier.

Dimensions: 100 x 150 x 40 mm
