

PACK OF 37 SENSORS

Reference : CAPTEURKIT

Set of 37 sensor modules supplied in a storage box.
They are intended for use with an Arduino Uno type card (not included)

Composition:

- Joystick module
- Relay Module
- Rotary encoder module
- Clock module
- Ultrasonic sensor module
- Presence detector
- Flame detector module
- Hall effect module
- Metal detector
- Digital temperature sensor
- Large microphone module
- Small microphone module
- RGB LED module
- CMS RGB Module
- Two-colour LED module
- 7 colour flash module
- Laser transmitter module
- Impact sensor module
- IR transmitter module
- IR receiver module
- Switch module
- Button module

- Active buzzer module
- Passive buzzer module
- Temperature module
- Photoresistor module
- Temperature and humidity sensor
- 3-axis gyroscope module
- Optical fork module
- Sensory sensor module
- Keyboard module
- Obstacle detection module
- Line tracking module
- Magnetic field detector
- Water level sensor
- Power module
- LCD screen module 16x2
