Extensively resistant probe
This probe has a very strong steel rod.

Teflon protection is provided to protect the probe from corrosive products.

Technical characteristics:

- Measurement range: -35 to + 135 °C

Réf : PS-2153

Flexible probe
This probe is flexible and very fine.
It allows any temperature measurement.

Technical characteristics:

- Measurement range: -10 to +70 °C

Réf : PS-2135

Temperature of the surface of the skin
This probe has a wide measuring range that allows you to study many surfaces.

Common applications:
Measurement of skin temperature before and after exercise.

- Technical characteristics:
- Measurement range: -10 to +70 °C

Réf : PS-2131
