

# REPLACEMENT CARTS

Reference : ME-6950

## Pack of 2 PAScar carts

PAScar mobiles are made of polycarbonate, so they remain particularly light (250g). Each vehicle is equipped with a spring, magnets and Velcro strips to study different kinds of collision. The mobiles are offered in packs of 2 (one red and one blue) and are compatible with all accessories in the catalogue. The wheels and axles of the vehicles can be easily replaced when needed.
