

RESISTANCE MULTI-DECADES

References : DECR4, DECR5, DECR6, DECR7

- Metal box with inclined front
- Metal frame switches
These decade boxes are reliable and robust. The rotating switches have a metal frame, allowing intensive use by students over a long period.

Technical characteristics:

- Precision: $\pm 5\%$
- Maximum voltage: 50 V
- Intermediate socket every decade
- Metal box connected to a ground
- Maximum power: 0.5 W
