## Le brassage génétique des génomes à chaque génération : la fécondation entre gamètes haploïdes chez les ascomycètes

### Dihybridism Kit

- 1 box E: crossing of 2 yellow spore strains
- 1 box F: crossing of a yellow spore strain with a white spore strain

**Réf : 108D.**

### Monohybridism kit no. 1

- 8 Sheets A: wild strain with black spores x strain with yellow spores: recombinant asci
- 2 boxes B: crossing of a wild strain with a white spore strain
- 1 box C: autofructification of the wild strain
- 1 box D: autofructification of the yellow spore strain

**Réf : 108**

Monohybridism kit no. 2

- 8 Sheets A: wild strain (black spores) x yellow spore strain (recombinant asci)
- 1 box C: autoconstruction of the wild strain
- 1 box D: autofructification of the yellow spore strain

**Réf : 108/2.**
