

# SPECTROGONIOMETER

Reference : SPGON

This beginner's spectrogoniometer makes it possible to carry out the basic experiments in spectroscopy such as the measurement of the angle and the index of a prism, the pitch of an array, etc.

- Independent plate and bezel movements
- Reading the position with an accuracy of 30 ''
- Mobile plate: Ø 150mm
- Mobile telescope: x15 eyepiece with cross-hair reticule; lens Ø 32 mm, focal length 178 mm
- Fixed collimator: Achromatic lens Ø32 mm, focal length 178 mm; adjustable width source slot
- Prism or array holder plate
- Comes in a wooden storage box.
