

STRING VIBRATOR

Reference : MELDE2

Aluminium case - new design

Very compact device consisting of a robust speaker whose membrane ensures the transmission of vibration to an axis positioned at its centre. This axis is provided with a fixing system allowing the positioning of various accessories: metal rods, elastic or non elastic ropes, springs, etc.

Technical characteristics:

- Intensity: 1 A
- Fuse protection
- Electrical connections with 4mm safety sockets
- Dimensions: 140 x 110 x 85 mm
- For use with an amplified low frequency generator.
