

# TRANSILLUMINATOR

Reference : BLUEBOX

## **New version: slimmer, goes under all electrophoresis tanks!**

The transilluminator, combined with the SafeGreen dye, makes it possible to transform your standard electrophoresis tanks into tanks allowing a real-time and safe reveal of your migrations.

Composition:

- an ultra-powerful blue LED waterproof and low voltage lamp, measuring (LxWxH) 9 x 6 x 1.6 cm, which goes under all electrophoresis tanks. It works with a mains transformer (supplied) and a radio remote control running on a CR2025 battery (supplied).
- A transparent 10 x 10 cm orange PMMA Sheet that fits all electrophoresis tanks.
