

Reference : VOLC

An eruption seen from the inside!

This very demonstrative model allows through the observation of an erupting volcano section to better understand the functioning of a volcano:

Where does the lava come from

What makes the magma rise

How is a magma chamber created

Composition :

- 2 plexiglass plates (150 x 150mm and 140 x 150mm)
- 1 syringe of 60ml
- 1 pre-pierced hose
- 4 fixing clamps
- 1 locking clamp
- 100g of washed sea sand
- 10ml of methyl red
