

References : AQUADI250, AQUADI250PIS

## Scalable

Single cycle (by raw water supply or reverse osmosis). Double cycle possible (installation of two AQUADI 250 in series)

- Simple

Only one raw water (or osmosis water) inlet is necessary.

Assembly and disassembly is carried out by quick couplings.

The unit is fixed on a wall plate

- Practical

Wall mounting, followed by saturation of the resin by colouring (transition from bluish green to light brown)

Easy change of consumable using the key included.

## Technical characteristics:

- Resin volume mixed coloured beds 2.5 litres
- Max flow 60 L / H
- Outlet on clear hose or with dispensing gun (depends on the model)
- Max input pressure 4 bar
- Max inlet temperature 40 ° C
- Height 650 mm

Model with gun included
